DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-14 and 37-43, drawn to a recording/reproducing apparatus for controlling recording/reproducing of the picked-image signal between said first and second recording media, classified in class 386, subclass 52.
 - II. Claims 15-36 and 44-53, drawn to a recording/reproducing apparatus for mixing the signal read from the second recording medium with the picked-image signal and for writing a mixed signal on the recording medium, classified in class 386, subclass 117.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions Group I and Group II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention of Group II has separate utility such as adding data to the picked-image and then recording the added picked-image signal on the recording medium. See MPEP § 806.05(d).
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 2615

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Thai Tran whose telephone number is (703) 305-4725. The examiner can normally be reached on Mon. to Friday, 8:00 AM to 5:30 PM.
